

# CLASSIC VAULT DOOR

U.L. CLASS I, II, AND III

## Ultimate Security with Contemporary Styling

- Maintenance-free stainless steel satin finish on all exposed metal surfaces
- The decorative operating wheel activates the full-length locking bar
- Passes Underwriters Laboratories' most severe tests attaining U.L. listings Class I, Class II and Class III
- When activated, a daytime safety detent lock prevents the locking of personnel inside the vault under holdup conditions
- Classic adjustable door hinge with precision anti-friction bearings balances the door perfectly so that it opens with relative ease

# CLASSIC VAULT DOOR

## U.L. CLASS I, II, AND III

### Features

- Maintenance-free stainless steel satin finish on exposed metal surfaces includes full-length locking bar, door edges and jamb of the opening.
- Activated operating wheel insures top-to-bottom contact with the door's locking jamb.
- Two concealed U.L.-listed combination locks behind the stainless steel hinged front panel secure the daytime safety detent lock when activated, securing the locking bar in an open position to prevent the locking of personnel inside the vault is prevented under holdup conditions. This detent key lock is located behind the door's rear stainless steel operations panel. A built-in emergency ventilator is concealed in the door.
- Built-in micro-switch designed to activate an alarm if the locking bar is not fully engaged when the door is closed and locked.
- A three-movement 144-hour timelock is concealed behind the flush panel on the back of the door. The timelock is equipped with an emergency release designed for resetting in case of accidental overwind.

#### Floor Level: Flat Sill with Full 36" Clear Opening

Bridgeman's Standard Daygate features a brushed stainless steel grillwork. An optional deluxe tinted tempered glass daygate is also available.
